**11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS**

The above numbered solicitation is amended as set forth in item 14. The hour and date specified for receipt of Offers  is extended,  is not extended.

Offers must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended by one of the following methods: (a) By completing items 8 and 15, and returning \_\_\_\_\_ copies of the amendments; (b) By acknowledging receipt of this amendment on each copy of the offer submitted; or (c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. **FAILURE OF YOUR ACKNOWLEDGMENT TO BE RECEIVED AT THE PLACE DESIGNATED FOR THE RECEIPT OF OFFERS PRIOR TO THE HOUR AND DATE SPECIFIED MAY RESULT IN REJECTION OF YOUR OFFER.** If by virtue of this amendment you desire to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

**12. Accounting And Appropriation Data (If required)**  
NO CHANGE TO OBLIGATION DATA

**13. THIS ITEM ONLY APPLIES TO MODIFICATIONS OF CONTRACTS/ORDERS**

KIND MOD CODE: 7 **It Modifies The Contract/Order No. As Described In Item 14.**

SECTION C - DESCRIPTION/SPECIFICATIONS/WORK STATEMENT

C.4 RESERVED

C.5 HAZARDOUS MATERIALS

C.5.1 The contractor shall not deliver cadmium, hexavalent chromium, or other highly toxic or carcinogenic materials without prior Government approval. No Class I or Class II substances shall be used. FM200 shall be used as the ozone-safe fire extinguishing agent in the occupied spaces, while HFC125 (FE-25) shall be used as the ozone-safe fire extinguishing agent in the engine compartment. The contractor shall not use materials that are identified in the Registry of Toxic Effects of Chemical Substances, published by the National Institute for Occupational Safety and Health, as materials that will produce toxic effects via the respiratory tract, eye, skin, or mouth. Moderately toxic materials may be used provided the design and control preclude personnel from being exposed to environments in excess of that specified in 29 CFR 1910, Occupational Safety and Health Standards.

C.5.1.1 Hazardous Materials Management Program/Plan. The contractor shall establish, implement and maintain a Hazardous Materials Management Program using National Aerospace Standard 411, "Hazardous Materials Management Program" as a guide. The contractor shall develop a Hazardous Materials Management Plan which, at a minimum, shall identify and describe the organizational relationships and responsibilities for eliminating hazardous materials, define the process used to identify the hazardous materials utilized in the manufacturing process, and establish prioritization criteria for ranking the relative risk of these hazardous materials.

C.5.1.2 Hazardous Materials Management Report. The contractor shall submit a Hazardous Material Management Report IAW CDRL A001 which, at a minimum, shall identify all hazardous materials used or delivered in the performance of this contract (excluding materials/equipment provided by the Government). Contractor's report shall include a listing of prioritized hazardous materials for minimization/elimination per the criteria established in the Hazardous Materials Management Plan, and identify those hazardous materials/processes for which non-hazardous substitute materials/technologies may be available for implementation.

C.5.2. The following exceptions are incorporated for the Paint/pretreatment process:

a. Vinyl Wash Pretreatment Deletion on Painted Hulls, Doors, Hatches, Grills, and Fuel Tanks. Contractor shall establish and demonstrate a quality control process that validates/ensures paint adhesion.

b. Eliminate Painting of Interior Stainless Steel Components. The contractor will eliminate all prewash and painting on the following part numbers: 10626247-PC (bolt), 10638218-PG (screen), 10652324-011 (retainer, seal), 10654451-001 (bracket), and 10652472-001 (screen).

c. The contractor shall not utilize hexavalent chromium in the pretreatment process for aluminum. The contractor shall instead use commercially acceptable alternatives to pre-treat aluminum, which include but are not limited to; Oxsilan - AL-0500; Alodine 5200; and Alodine 5700. Anodizing per MIL-A-8625 is permissible providing Type I and IB are not utilized since these incorporate hexavalent chromium. The contractor must use alternative non-chrome sealers as discussed in para. 3.8 of MIL-A-8625. Anodized components which will subsequently be painted shall use nickel or cobalt acetate based sealer. For components which are anodized and not subsequently painted, the recommended sealer is EnviroSeal 2500 or an equivalent. Aluminum components requiring conductivity, shall be treated in accordance with MIL-C-5541, Class 3.

C.5.3. If the contractor for any reason believes that hexavalent chromium based pre-treatment materials, and hexavalent chromium/cadmium components, other highly toxic or carcinogenic materials, are the only acceptable substance/components with no known alternatives, then the contractor shall seek Government approval in accordance with C.5.1 of the contract prior to delivering any such item. The Government will consider waivers in these situations as required. Under no circumstances will hexavalent chromium containing components or items be used or delivered to the Government without prior Government approval.
